

INI selected to present at New York Venture Summit – June 25th, 2008

Morrisville, NC: INI Power Systems, Inc. has been selected to present and exhibit at the 8th Annual New York Venture Summit, held June 24-25th 2008, at the New Yorker Hotel in New York City (www.vcsummit.com).

New York Venture Summit: This summer, hundreds of venture capitalists, angel investors, executives of early stage and emerging growth companies, incubators, investment bankers, successful entrepreneurs, premier service providers and industry leaders will gather in New York City for the 8th Annual NEW YORK VENTURE SUMMIT.

INI Power Systems: INI is developing, manufacturing and licensing clean portable power components and systems to a wide variety of markets to augment or replace batteries and generators. INI uses methanol – a high energy density and logistically friendly liquid fuel – in a patented microfluidic system to generate power, INI's products are ideally suited for Consumer Electronic, Industrial, and Safety and Security markets. INI's core LFFC® concept patent was issued in the US in March 2004, allowed in Korea in 2007, and is patent pending in Japan, the European Union, and Canada. INI has successfully leveraged equity financing to demonstrate proof-of-concept, scalability and performance consistent with commercial operating requirements, achieving performance milestones in 2007. The Company is now actively engaged in product engineering efforts, and is marketing units to commercial and military customers. INI has confirmed purchase orders from a UPS/telecom service provider, a European Defense Agency, and has a Joint Development Partnership with a leading Japanese laptop/battery OEM.
